

## Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact [support@jstor.org](mailto:support@jstor.org).

# Eastman Organic Chemicals

MADE IN U. S. A.

## ***Quality Unsurpassed***

Our aim is to produce the best chemicals. Purity criteria, determined in our laboratories are given whenever possible, after each chemical named in our list. Eastman quality is synonymous with the most rigid specifications of purity.

## ***Largest Stock in America***

Over 1400 organic chemicals are on our shelves. Nowhere in America is there so complete a stock of fine organic chemicals. New ones are added almost every day. This large stock assures prompt attention to all orders, large or small.

## ***List Number 8***

Our latest price list No. 8 is a handbook of America's organic chemicals. Its quality specifications are invaluable.

**BOOKBINDING UNDERTAKEN BY EXPERIENCED WORKMEN.**

**Always mention the JOURNAL OF BOTANY when answering our advertisements.**

# Professional Advancement Service

---

THE PROFESSIONAL ADVANCEMENT SERVICE seeks to aid men and women in botany and related subjects in securing such positions as they may desire, and to offer to heads of departments, or directors of laboratories, experiment stations, or other institutions an opportunity of making known the vacancies they seek to fill.

THE METHOD OF THE SERVICE consists in publishing in the American Journal of Botany a brief notice stating the training and experience of the applicant or the requirements of the vacancy. Each person using the Service is designated by number and his identity may be learned on application to the Business Manager of the American Journal of Botany. A list of eligibles and open positions is kept, and inquiries are referred to the advertisers who are mentioned or seem best suited to the requirements stated. The Professional Advancement Service may thus have the opportunity to mention a man for a desirable position or a promotion a number of times during a period of several months. The charge for the service is \$2.00 for each case for one year or less. The notice regarding qualifications offered or desired will be published at frequent intervals, but not more than ten times.

Address: The Business Manager, American Journal of Botany, Brooklyn Botanic Garden, Brooklyn, N. Y.

---

**No. 47.** Graduate, University of Amsterdam and Agricultural College. Broad training and experience in plant breeding, plant physiology, genetics, economic and general botany. Eastern and western American teaching experience as Professor. Studied several years extensively in various institutions in England, France, Germany, Holland, Sweden, Norway, Denmark, Switzerland, Belgium and Italy. Formerly Scientific Director of private Plant Breeding Station. High class recommendations. Desires position in University or *private* enterprise.

---

**No. 48.** Botanist, Ph.D. of five years' standing, with experience in research and teaching, wishes to improve condition. Member technical and honorary societies. Fellow A.A.A.S. Especially interested in physiology and pathology. Several publications. Would like research position or teaching position with sufficient time for research. North central section of the country preferred.

---

**No. 49.** Botanist, Ph.D. from a leading university, also from a first rate agricultural college, with thirteen years teaching experience (six in India), desires position, preferably combining teaching with research. Numerous publications, principally ecological. High recommendations. An opening in a tropical or sub-tropical region is especially desired.

---

**No. 50.** Wanted—laboratory instructor in beginning college botany—a young man of good bearing who looks forward to a college or research career in botany and who has perhaps begun graduate work. Preferred that his research interest should be in mycology. Opportunities and prospects good: salary modest.

---

**No. 51.** Botanist, student of Pfeffer and Fischer, degrees from the Universities of Zürich (1901), Warsaw (1904), and Moscow (1909). Wide experience as privatdozent; professor and director of botanic laboratory and botanic garden in various institutions in Russia and Tschecho-Slovakia. Thirty-eight published papers in plant physiology, including a text-book of plant physiology of 612 pages. Seeks opportunity for research combined with instruction in an American university or agricultural experiment station. List of publications and further information on request.

---

**No. 52.** Man, experienced botanist and teacher, affiliated past seven years with university in large city will make some sacrifice, if necessary, to return to institution in small city or town. Former experience in three other colleges and universities. Correspondence invited.

# BROOKLYN BOTANIC GARDEN MEMOIRS

## VOLUME I—DEDICATION PAPERS

CONTAINING 33 CONTRIBUTIONS; PAGES 1-521; PLATES 1-28;  
TEXT FIGURES 41

TABLE OF CONTENTS WILL BE MAILED ON REQUEST

The papers contained in this volume were presented April 20-21, 1917, either in person or by title, at the Scientific Program, which formed part of the Dedication Exercises on the occasion of the completion of the Laboratory Building and Plant Houses of the Brooklyn Botanic Garden.

PUBLISHED JULY 6, 1918

Price, \$3.50 plus postage. Weight, 4 lbs. Remittance should accompany all orders.  
Not offered in exchange

# NEW BLAKISTON BOOKS

## PALLADIN-LIVINGSTON PLANT PHYSIOLOGY

A second printing with numerous corrections, additions and improvements. One new feature is a summary for each chapter in which a succinct but complete statement of the main features dealt with in each is given. The text is concise, readable and exceptionally thorough in treatment and with well chosen citations from the literature of plant physiology. The chemical aspects have been given greatest emphasis.

2nd printing. 173 illustrations. By VLADIMIR I. PALLADIN (University of Petrograd). Authorized English Edition, Edited by BURTON E. LIVINGSTON, Ph.D., Professor of Plant Physiology and Director of Laboratory of Plant Physiology, Johns Hopkins University.

## FOLSOM ENTOMOLOGY

With Special Reference to Its Ecological Aspects

This edition has been brought up to date by the inclusion of a great deal of new material and some new illustrations; a new chapter on insect ecology has also been added.

3rd Edition. Illustrated by plates and text illustrations. By JUSTUS WATSON FOLSOM, Sc.D., (Harvard) Assistant Professor of Entomology, University of Illinois.

**P. Blakiston's Son & Co., Philadelphia**

## *You Will be Interested in* **A Naturalist in the Great Lakes Region**

By ELLIOT R. DOWNING

A new type of illustrated Nature-guide that will help the student to identify the living things he sees on the earth and in the air and water by showing how Nature, following a definite system, has combined plant and animal life into groups or associations. A book for the hiker's knapsack and the nature-study class.

Educational Edition, cloth \$2.50, postpaid, \$2.60

De Luke Edition, flexible binding, \$3.50, postpaid, \$3.60

## **Methods in Plant Histology**

By CHARLES JOSEPH CHAMBERLAIN

This book (third edition, completely revised) contains directions for collecting and preparing plant material for microscopic investigation. Killing and fixing, freehand sectioning, the paraffin method, the Venetian turpentine method, the celloidin method, and the glycerine method are treated in detail, and chapters on making photo-micrographs and lantern slides have been added.

Illustrated, \$3.25, postpaid, \$3.37

J. C. ARTHUR

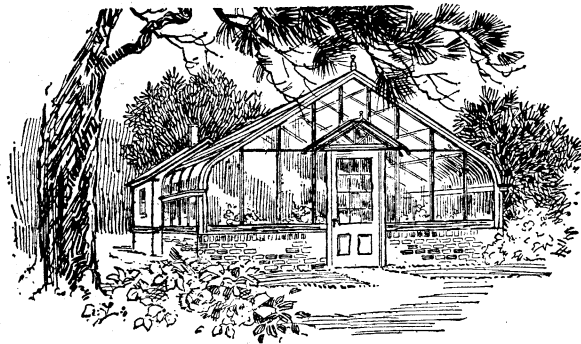

*Purdue University*

C. E. ALLEN

*University of Wisconsin*

Any one actively interested in botanical work is eligible for membership. Candidates for membership must be recommended by three members, not members of the Council, on blanks to be obtained from the Secretary.

The annual dues are \$5.00, including one subscription to the AMERICAN JOURNAL OF BOTANY. Candidates proposed for membership, and approved by the Council, may receive one copy of the JOURNAL at \$4.00 per year pending their election at the winter meeting of the Society.

## A Fair And Frank Way To Buy Your Greenhouses

You and I know full well that salesmen have a way of putting the best foot forward, so to speak. In which particular, ours are quite like the rest. They honestly believe we build the best that's built.

Their belief, however, is not based so much on what we have told them as on what they have seen of our houses and our way of doing things.

What they really sell is their confidence in Hitchings & Company.

After which the buyer himself sells the greenhouse to himself.

The shortest short cut to that point of satisfaction, is to go and see some Hitchings houses and talk with their owners.

With that in mind let us send you names of some nearby houses.

We will gladly go with you, however, that is as you may incline.
